The mother, brother and sister in law situation

Diary 10/12/2022 - Stomach ache, feeling high, mocked by brother, cousing and so on

The fake image in front of people situation

As I wrote in the previous document, people are sharing rumors against my will about my life, defamation, rumors about me doing drugs or drinking, and they keep doing that just to ruin my life, and make everyone around me leave me.

Not only friends (that sometimes I am able to expose the truth about everything and they just start around and get disgusted by those people) but also job seekers, girls on tinder and so on. They literally get informed about my life, such as who I am talking to on whatsapp or instagram for instance, then take actions based on my that PERSONAL INFORMATION to reach that person somehow or someone related to them, then they find a way to lie about me or any other creepy way to make those people fear me or get disgusted by the fake stories they tell them, so they just ghost me, or try to keep around me and they suffer a lot because they don't leave those people alone. By the way, some friends of the past are still being tortured by those people, because they committed the mistake of trying to befriend me at some point, and some of them are not even aware, they are just probably losing some money or personal objects, losing some friends, not being able to land a job, and they don't even know that the reason is that they are also victim of the same thing I am going on right now.

Some of the people that keep doing that, that I am 100% sure are Chris, from the link above and his friends, my cousin Rafael and his family (to make me unable to have people around so he can keep doing the same shit without consequences, since I have no one to ask for help) and Rafael's family. They literally rub in my face "We are taking all the measures possible to isolate you so we can keep ruining your life just for fun, then we will just kill you somehow when that happens" which explains the milk story from the document above.

The “ruining your life” situation

Some people are literally participating in my life against my will, some of them are related to my ex, who is happily engaged and as it seems don't care much about my existence. But her family still contacts me to get confidential information about myself, which they already use to ruin job interviews, relationships, friendship and more. They actually spied on some girls I was dating and forced them to not be a part of my life any longer in a lot of different ways.

They also insisted on reaching me and saying shit while I was doing a job interview, making me and the interviewers embarrassed sometimes, the ones that were aware at least. It's just a old relationship that ended a long time ago, since that time they participated against our will in every life decision, and after the break up they just decided to do the same, ruining most of the outcomes of my life by manipulating information and telling people lies about me, such as I am a drug-addicted or a shoplifter, and all other sorts of rumors.

On top of that, people like my sister in law Bruna and her brother Mateus, for instance, keep doing behaviors like doing everything that I told you before, and then contacting me just to mock me and rubbing in my face that everything just happened because of them, they literally do that and brag that they are ruining peoples life just for fun, just because they don't like me, and I am not the only one they are doing that.

The same behavior was done by a dude from my past and his friends (I studied together with them in eighth grade in juniors high), most of them are involved with drug dealers, drug addicts, and they act inconsequent and do shit to me:

The sleeping situation

Everytime that I am sleeping, people reach me to talk about sex, including people quoted in this document and more. They talk about sex, they brag that they are having sex while contacting me, and much more. They do that every single night, each one for a specific purpose. That not only ruin my life and the life of my friends, since they talk to me while I am asleep, so they can mock me because I am not awake and saying stupid words and answering their questions, since I am not awake and they literally talk to my sub-conscious self. Sometimes I even get woke in the middle of the night by them, feeling weird sexually because they manipulate me to turn me on while I sleep by talking creepy to me. They keep repeating that behavior every single day, and I can confirm to everyone who is interested in reaching me while I am trying to sleep by 9-10PM GMT-03.

Most of my female friends are scared by this because they get involved in the disgusting dirty talk they usually do

Mensagem lá pra fevereiro para Tais, perguntar se o negócio de distância ainda tá válido, ver como vai ser com a Nina, pensão, visitas, e deixar ela ciente da parte judicial pra não pegar de surpresa (regulamentar visita e pensão)
